

Peach State Health Plan

Appropriate Use and Safety Edits

The health and safety of our members is a priority for Peach State Health Plan. One of the ways we address patient safety is through point-of sale (POS) edits at the time a prescription is processed at the pharmacy. These edits are based on Food and Drug Administration (FDA) recommendations and promote safe and effective medication utilization of our members. The following outlines the type of appropriate use and safety edit and affected drug class or classes that are in place at Peach State Health Plan.

Quantity Limits: Restrictions on claim quantity per day implemented to prevent doses above the FDA approved guidelines. Multiple medications within different drug classes have quantity limit requirements.

Lower Age Limits: Restrictions on age implemented to prevent children below the FDA approved age of receiving medications off-label. Current drug classes with lower age limits include (but are not limited to):

- > Atypical Antipsychotics
- > Benzodiazepines
- > Long-Acting ADHD Medications (Stimulants & Non-Stimulants)
- > Migraine Rescue Medications (Triptans & Non-Triptans)
- > Sedative-Hypnotics
- > Short-Acting ADHD Medications (Stimulants only)

Upper Age Limits: Restrictions on age implemented to prevent adults from receiving medications commonly indicated for pediatric use only (without proper documentation of diagnosis). Current drug classes with upper age limits include (but are not limited to):

- > Long-Acting ADHD Medications (Stimulants & Non-Stimulants)
- > Short-Acting ADHD Medications (Stimulants only)

For specific quantity limits and age limits please see the Peach State Health Plan Preferred Drug List

Appropriate Use and Safety Edits

Duplicate Therapy Edits: Restrictions on claims implemented to prevent members from receiving excessive medication regimens within the same (or similar) drug classes. Current drug classes with duplicate therapy edits include (but are not limited to): [see page 6 for programming details](#)

- > ACE Inhibitor/Angiotensin Receptor Blockers
- > Alpha Agonists (Pediatrics only)
- > Antidepressants (All classes)*
- > Atypical Antipsychotics
- > Benzodiazepines
- > Diabetic Medications (Sulfonylurea/Meglitinides)
- > Long-Acting ADHD Medications (Stimulants & Non-Stimulants)
- > Muscle Relaxants
- > Sedative-Hypnotics
- > Selective Serotonin Receptor Inhibitors & Serotonin Norepinephrine Receptor Inhibitors
- > Short-Acting ADHD Medications (Stimulants only)*
- > Tricyclic Antidepressants

For duplicate therapy edits, members are restricted to one medication per drug class per month, except those classes with () where edits allow two medications per drug class per month.*

Dose Consolidation Edits: Restrictions on claims implemented to prevent members from receiving multiple strengths of the same medication. Current drug classes with dose consolidation edits include (but are not limited to): [See page 8 for programming details.](#)

- > Atypical Antipsychotics
- > Long-Acting ADHD Medications (Stimulants & Non Stimulants)
 - > Selective Serotonin Receptor Inhibitors & Serotonin Norepinephrine Receptor Inhibitors
- > Short-Acting ADHD Medications (Stimulants only)

Step Therapy Edits: Restrictions on claims implemented to steer members toward the preferred medication in the drug class. Current drug classes with step therapy restrictions include (but are not limited to): [See page 9 for programming details.](#)

- > Antidepressant Agents
- > Angiotensin Receptor Blockers
- > HMG Co-A Reductase Inhibitors
- > Ophthalmic Antihistamines
- > Sedative-Hypnotics

Fraud and Abuse Edits: Restrictions on narcotic claims implemented to prevent members from receiving excessive drug regimens that can be considered abusive or fraudulent in nature.

For specific quantity limits and age limits please see the Peach State Health Plan Preferred Drug List

Appropriate Use and Safety Edits

- > Narcotic Claim/Quantity Limits/Restrictions (Does not apply to Cancer, Sickle Cell, or Palliative Care)
 - Max 2 opioid medicines per 30 days
 - Max 50MME for total (SAO) dose for treatment-naïve
 - Max 90MME for total (SAO and LAO) dose for treatment-experienced
 - Max 7 days' supply for short-acting opioids for treatment-naïve
 - Requirement of short-acting/immediate release opioid use before long-acting opioid therapy
 - Regimens restricted to a total of 180 units of narcotics per month
- > Detox Agents & Narcotics (prevents members from receiving detox agents when narcotic use is ongoing)

Teratogenic Edits: Restrictions on claims implemented to prevent female members from receiving potential harmful medications prior to confirmation of pregnancy status. (Multiple medications within different drug classes have teratogenic requirements.) [See page 4 for programming details.](#)

Safety Edits: Restrictions on claims implemented to prevent members from receiving combination drug regimens that are contraindicated or have been deemed toxic and potentially life threatening. Current drug classes with safety edits include (but are not limited to):

- > Human Immunodeficiency Virus Medications [See page 5 for programming details.](#)
- > Low Dose Seroquel [See page 5 for programming details.](#)
- > Suboxone/Subutex & Narcotics [See page 5 for programming details.](#)

The following tables detail the specific drugs or processes that are affected by the appropriate use and safety edits in place at Peach State Health Plan.

Teratogenic Edit Programming Details		
Step	Question	Answer/Action
1.	Is member female?	Yes: Go to Step 2 No: Process claim
2.	Is member between 11 – 50 years of age?	Yes: Go to Step 3 No: Process claim
3.	Does the member have an active claim for contraception or hormone replacement therapy?	Yes: Process claim No: Go to Step 4
4.	Is the member pregnant? (Pharmacist to ask member at POS)	Yes: Go to Step 5 No: Process claim
5.	Is the drug labeled as pregnancy category X?	Yes: Deny claim No: Go to Step 6

For specific quantity limits and age limits please see the Peach State Health Plan Preferred Drug List

Appropriate Use and Safety Edits

6.	Is the drug labeled as pregnancy category D (risk outweighs benefit)?	Yes: Deny claim No: Go to Step 7
7.	Is the drug labeled as pregnancy category D (benefits may outweigh risk)?	Yes: Go to Step 8 No: Process claim
8.	Call prescriber. Does benefit outweigh risks?	Yes: Process claim No: Deny claim

Teratogenic Edit Medications	
Pregnancy Category X	5-Alpha Reductase Inhibitors, Anabolic Steroids, Androgens, Anorexiant, Antineoplastics, Coumadin Anticoagulants, Endothelin Receptor Antagonists, Hepatitis Agents, HMG CoA Reductase Inhibitors, Non-Barbiturate Hypnotics, Migraine Agents, Non-Steroidal Antiinflammatory, Progesterone Receptor Antagonists, Progestins, Prostaglandins, Retinoids, Stimulant Laxatives, Etc
