Prenatal Care Clinical Practice Guidelines (CPG) Medical Record Audit (MRA) Report

The CPG Medical Record Audit (MRA) process assesses whether the provider's medical practices conform to clinical standards of practice. The audit tool serves as an instrument to gather information on the use of evidence-based clinical practice guidelines in order to identify the effectiveness, or lack thereof, of the treatment provided in accordance with the guidelines. This audit tool incorporates the standards, established by the American College of Obstetricians and Gynecologists (ACOG), for Prenatal Care.

Guidelines for Perinatal Care 8th Edition https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.

What is a Clinical Practice Guideline?

The IOM in its newest definition describes CPGs as 'statements that include recommendations, intended to optimize patient care, that are informed by a systematic review of evidence and an assessment of the benefits and harms of alternative care options.' (Consensus report, Institute of Medicine. Clinical practice guidelines we can trust. March 23, 2011)

Purpose of Clinical Practice Guidelines

The intent of clinical practice guidelines is to:

- 1. Improve the quality of patient care and health care outcomes
- 2. Summarize research findings and make clinical decisions more transparent
- 3. Reduce inappropriate variation in practice
- 4. Promote efficient use of resources
- 5. Identify gaps in knowledge and prioritize improvement activities
- 6. Provide guidance for consumers and inform and empower patients

Source: Davis D, Joanne G, Palda VA, Handbook on Clinical Practice Guidelines, Canadian Medical Association

The number of providers audited each quarter will reflect no less than 20% of the total allocated providers within the CMO who submitted a claim for Prenatal Care during the review period. The clinical reviewer will randomly select 4 - 5 medical records of the selected providers for the review of Prenatal Care according to the CPG. The Georgia Families CMOs are required to collaborate to develop a process of equally dividing all providers and assigning each CMO the same group of providers on an annual rotation, or as a rotation as agreed between DCH and the CMOs. Individual CMO should create a review process that: 1) ensures at least 90% of total allocated providers are reviewed by the end of the review year and 2) avoids repeat reviews of any one provider, unless in the event of a reaudit for a previously identified deficit.

The provider's office manager or designee should be notified in advance of the pending MRA. The medical records should be pulled upon the arrival of the reviewer or may be submitted directly to the CMO (paper or electronic version) for review. Reviewers must utilize the DCH-approved forms (see attached) to conduct the audits. All individually identifiable health information must be kept confidential and private by the reviewer, in accordance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and applicable Medicaid laws and regulations. Findings of audit must be shared with the provider within seven (7 days) of the MRA.

CPG MRA Process:

1. Provider Audit

The CPG Provider Audit Form (Form A) should be completed and submitted to DCH for each provider selected for review. Based on the identified indicators, the reviewer should thoroughly evaluate the medical record to determine whether the provider's medical practices conform to the clinical practice guidelines for the particular medical condition. Weights have been assigned to each indicator based on the degree of its importance to the members' overall health outcomes. The weights are calculated to render a weighted rate. Each indicator should be represented with a 'Y' for Yes, if the documentation is found in the member's medical records; or an 'N' for No, if the documentation is **not** found in the medical records. (Note: When an indicator is determined to be 'Not Applicable,' indicate 'N/A.' The assigned weight of that indicator will be credited in calculating total compliance rate). Please note: DCH reserves the right to request justification for indicators deemed as 'N/A'. If a provider scores less than the 80% compliance threshold for any **individual** indicator (see Indicator Rate column in Form A), the provider should be re-audited within the second quarter of the initial audit, for the same indicator(s) that resulted in the re-audit (e.g. provider had a total of 5 audited records and only 3 records scored a 'Y' or 'N/A' for the individual indicator, this would be equal to a compliance rate of 60%; if deficit is identified in Q1, the reaudit should be completed in Q3).

2. <u>Summarized Medical Record Audit Form</u>

The Summarized Medical Record Audit (Form B) must be submitted to DCH within 30 days from the end of each quarter. The Summarized MRA, a compilation of the CPG Provider Audits, provides the average compliance rate per indicator and the average overall compliance rate of the providers selected for review.

3. CPG Quarterly Report

The CPG Quarterly Report (Form C) must be submitted to DCH within 30 days from the end of each quarter. The Quarterly Report, which may be submitted as a Microsoft Word or Excel document, should be completed in accordance with the CPG MRA Specifications.

4. <u>Cumulative Medical Record Audit Report</u>

The Cumulative Medical Record Audit Report (*Form D*) must be submitted to DCH within 30 days from the end of each quarter. The Cumulative MRA Report is a compilation of the weighted rates calculated for each quarter. The purpose of this document is to inform DCH and the CMOs of the quarterly trends for compliance with this CPG.

	Provider Focused Revi	ew process:					
Deficits Outcome	 The CMOs must conduct a Provider Focused Review if a provider scores less the 80% compliance threshold for any individual indicator (see Indicator Rate column in Form A), [e.g. provider had a total of 5 audited records and only 3 records scored a 'Y' or 'N/A' for the individual indicator, this would be equal to compliance rate of 60%]. Notify provider of the need to re-audit and provide education and/or peer coaching on indicators targeted for re-audit. Note : If less than three (3) additional records are available by the re-audit period, the CMO will delay the re-audit until there are at least three (3) record available. Re-audit in the second quarter following the quarter when the deficit was identified (e.g. deficit is identified in Q1, the reaudit should be completed in C If no deficits are identified at re-audit, no further action is needed. For deficit beyond re-audit, CMOs will complete a Corrective Action Plan (CAP). If deficiency persists following completion of a CAP, CMOs will be required to the provider to the CMO's Peer Review Committee for determination of next and the outcomes should be reported to DCH via Quarterly Report (Form C).
